

# Measure Your Savings With The World's Most Affordable Automatic CMM

## Easy To Buy, Easy To Use

With proven productivity, economy, and reliability in both small NC shops and big manufacturing plants, the Sheffield® Discovery™ II CMM offers great performance at a great price. Use it to verify part quality up to 20 times faster than manual methods. Check machine tool set-ups and streamline process control automatically with plug-and-play simplicity.

## Goes Anywhere You Need It

Advanced composite materials, hardened machine tool ways, automatic temperature compensation, and no need for shop air make the Discovery II a natural for your shop floor. Roll it anywhere you need inspection. Just plug it in to a standard 110 volt outlet, connect its computer and you're ready to run.

## Requires Minimal Training

Standard MaxLite™ inspection software lets you run part programs—and even create new programs—by following step-by-step screen prompts. For the ultimate in shop floor simplicity, optional MeasureMax+™ software lets you use its Single Touch Interface™ mode to run programs by touching pictures on the monitor screen.
